

Non-Contact Current Detector

Locates current in hidden wires and cables

CAT III-600V

Features:

- Non-contact AC Current range is from 200mA to 1000A
- Locates current flow even where voltage detectors cannot work
- Detects through shielded wires, conduit and metal circuit breaker or junction boxes
- Sensitivity adjustment for locating wires/conduit through walls
- Ideal for locating hidden conductors
- Audible and visible indication
- Small size with pocket clip
- Dimensions: 5.7x1.1x1" (145x28x25mm)
Weight: 1.6oz (45g)
- Complete with pocket clip and four LR44 button batteries

Applications:

- Locates wires in conduit
- Identify underground cables
- Trace low voltage HVAC wiring
- Detect leakage currents
- Find hidden wiring
- Verify energized AC solenoid and motors
